ABDELFETTAH BOUIZDOUZENE

AUTOMATION & COMMISSIONING ENGINEER

Mohammedia, Morocco | +212 776 265 453
bouizdouzenea@gmail.com

PROFILE

Electrical and industrial control engineer with experience in multi-brand PLC programming, HMI development, SCADA integration, industrial communication and commissioning.

PROFESSIONAL EXPERIENCE

Electrical Project & Commissioning Engineer

Casablanca, Morocco | February 2025 - present

• Develop equipment control programs covering operating sequences, status feedback, emergency stops, faults and alarms.

• Design HMI screens and integrate status, measurements and alarms into SCADA systems.

• Configure industrial communication, perform functional tests and troubleshoot faults on site.

• Prepare electrical load schedules, LV calculation notes, cable routing plans and single-line and wiring diagrams.

• Configure Sepam, ABB REF and MiCOM MV protection relays; prepare estimates and coordinate technical requirements with customers.

INDUSTRIAL PROJECTS

Centralised supervision of six stations

Siemens S7-1200 | TIA Portal | Teltonika VPN

Configured PUT/GET exchanges between a central station and five remote stations to collect status, measurements and alarms and transmit commands. Set up VPN communication and diagnosed network and S7 data exchange faults.

Mixing system automation

Kinco | Ignition

Developed the control program with a Kinco PLC and integrated Ignition supervision for process operation and monitoring.

Cement mill automation

Schneider Electric Modicon M580

Developed the PLC control program for the cement mill.

Paper cutting machine

Siemens S7-1200 safety PLC

Programmed machine control using a Siemens S7-1200 safety PLC.

Pumping station automation

PERAX

Developed pump control and operating status monitoring.

Crusher automation

Siemens S7-1500 | WinCC Advanced

Developed the PLC control program and the WinCC Advanced operator interface.

TECHNICAL SKILLS

PLCs
Siemens S7-1200 and S7-1500; Schneider Modicon M580; ABB, CLICK, Kinco, Mitsubishi Electric, Omron and Festo.

Programming and DCS
TIA Portal; Siemens SIMATIC PCS 7.

HMI and SCADA
WinCC, WinCC Advanced, AVEVA InTouch and Ignition.

Instrumentation
LabVIEW.

Industrial communication
PUT/GET, MQTT, multi-site VPN, Teltonika, IP addressing and routing.

Electrical engineering
LV design, load schedules, calculations, diagrams and cable routing. MV protection: Sepam, ABB REF and MiCOM. LOTO.

EDUCATION

State Engineering Degree
Electrical Engineering and Industrial Control
2022 - 2025
Faculty of Sciences and Techniques, Mohammedia, Morocco

Bachelor's Degree
Electronics
2021 - 2022
Faculty of Sciences Dhar El Mahraz, Fez, Morocco

Diploma of General University Studies
Physical Sciences
2019 - 2021
Faculty of Sciences Dhar El Mahraz, Fez, Morocco

LANGUAGES

French: fluent
English: fluent
